

Websites + Marketing Help

What can we help with?

Customize content

[Get online](#) | [Get to know Websites + Marketing](#)
[Set up my visual brand](#) | [Personalize my home page](#) | [Customize content](#)
[Get found with SEO](#) | [Connect to social](#) | [Accept online payment](#)

All content added to your site should provide some value to your visitors. Each section should reinforce the visitor's understanding of who you are, what you do, or what action people should take while on your site.

Goals for this section:

- Add and reorder pages.
- Add and move sections.
- Edit text, photos and videos.
- Publish your site.

Estimated time to complete: 30-90 minutes

A one-page site is just fine, especially if you're just starting out. But as you grow, you might want to start adding pages.

If you do want to [add a page](#), the [five core pages you need](#) are:

1. Home - who you are, what you do, and what people should do next.
2. About us - tell your business' origin story and connect with people.
3. Products and services - highlight customer benefits, don't just list features.
4. Testimonials - increase confidence and trust by adding recommendations and quotes.
5. Contact us - key information about your business and how people can reach you.

Add and reorder pages

Desktop

Mobile

1. Go to your GoDaddy [product page](#).
2. scroll to **Websites + Marketing** and select **Manage** next to your website.
3. Select **Edit Website** to open your Website Builder.
4. In the right navigation pane, select the plus sign to add a page.
5. Select  next to each page to open that page's settings. Here you can duplicate your page or delete a page. (You can't delete your home page.)
6. This is also where you reorder pages in your navigation menu.
 - a. In the **Site Navigation** menu, select  to reorder pages.
 - b. Use  next to each page to drag and drop your pages in the desired order.
 - c. Your Home page will always be the first page.

Add and move sections

The flow of information on a page can directly impact a visitor's ability to find what they're seeking. Over time, you may find certain sections should be above others, and some sections may even work best as separate pages.

Add a section to your page

1. Go to the page and locate the area where you want to add a new section.
2. Select the  that appears on your page.
3. Select the section type and layout you want, then select **Add**.

Move sections around within a page's layout or to a different page

Desktop

Mobile

1. For each section, hover over it and use the arrows at the top right of the section to rearrange its position on the current page or  to change the layout.
2. Select  to access the menu that will allow you to duplicate the section, move it to a different page or delete it.

Watch this video to see an overview of just how easy it is to edit a section or section group.

Edit text

Edit text directly on your site or in the editor panel. Any section with text allows you to [style the text](#) with bold, italic or underline, create numbered or bulleted lists, or include hyperlinks to another URL.

Some sections also have [action buttons](#), like the home page's header section. Use these buttons to link to specific pages or sections in your website, link to a phone number or email, or send people to another URL (such as your social media profile).

Add and edit photos and videos (and sound)

In addition to text, sections comes to life by adding images and some sections even support [adding video](#) to your media library or by using external links from YouTube or Vimeo.

When you're ready to add video, here's some examples of [different types of videos that help you move customers through the sales funnel](#).

In each section with photos, [add or replace the photo](#) with your own uploaded photo or with a stock photo from our media library. Once you [connect to your social accounts](#), those images will be linked and accessible in your media manager as well.

Easily [create professional-looking images](#) using [GoDaddy Studio](#). We've also got tips for how to take great photos in our [Be Your Own Creative Agency](#) How-To course.

Our [Advanced Design and Media in Website Builder](#) How-To course walks you through using the media library and image editor, adding a photo gallery or slideshow, as well as using video and audio such as [adding a SoundCloud audio track or playlist](#).

Publish your site

Now that you've gotten to this point, you're ready to [publish your site](#)!

You can continue making changes, but get it out into the world, share with friends, and ask for feedback!

Don't worry if you still want to do more with your site. The web is a large place, and it'll take time to grow your keywords and build an audience. Let's give your site a boost by [getting found with SEO](#).

 **Note:** If you're using the free trial or a free site, you'll need to pick a plan ([compare plans and pricing](#)). The cost of a domain name is separate from the cost of hosting your site. You may also need to [connect your site to your domain](#).
