

Websites + Marketing Help

What can we help with?

Connect to social media

[Get online](#) | [Get to know Websites + Marketing](#)
[Set up my visual brand](#) | [Personalize my home page](#) | [Customize content](#)
[Get found with SEO](#) | [Connect to social](#) | [Accept online payment](#)

Social media enables you to interact with your customers, instead of just communicating information to them.

Goals for this section:

- Connect your social media platforms to GoDaddy.
- Create a post.
- Display social media buttons on your site.
- Pull in reviews on your site.

Estimated time to complete: 15-45 minutes

Connect platforms to GoDaddy

By connecting your social media to GoDaddy, you can manage everything from one central location.

We've got some tips on choosing which social media platforms you need in [Lesson 18](#) from the [Marketing Basics with GoDaddy](#) How-To course.

You only need to be active on the social media accounts that are important for your audience, but it's nice to have the other accounts claimed so someone else doesn't use your business name.

From your Dashboard, select **Marketing** and then select any of the social platforms you want to connect: Facebook, Instagram, Twitter or Google My Business.

Once you select each of them, you can connect with an account you already have or create a new account.

One important note about Facebook and Instagram: You must have a [Facebook business account](#), an Instagram professional (business or creator) account, and [your Facebook and Instagram accounts must be linked](#).

Create a post

Are you wondering what to say on social media? Check out London's tips how small businesses can use social media, [Lesson 17](#) of [Marketing Basics with GoDaddy](#) How-To course.

Most importantly, create consistent content. It doesn't have to be daily. Even once a month or every other week works.

Take a moment to prepare your message and [create a professional-looking design on your own](#) using [Content Creator, powered by GoDaddy Studio](#).

When you're ready, open your site from your [My Products page](#).

From your **Dashboard**, go to **Marketing** and then **Facebook**, **Twitter** or **Google My Business**. Select **Create Post**.

Once you compose your message and add images or links, you're able to post to Facebook, Instagram, Twitter, or Google My Business all at the same time.

Display social media buttons on your site

When you're ready to [display social media buttons on your site](#), go to your **Dashboard** and select **Edit Site** to open your website editor.

Go to where you want to place your social media buttons and [add a section](#). Look for the **Social** section, then select **Add**. Edit your title, then copy and paste the URLs of each of your social media sites into the correct place.

To display images from your Instagram account, [add another section](#) and look for the **Social Feed** section. Choose a layout, select **Add** and customize the title. You're only allowed one Instagram feed in your site. If you don't see it in the section list, then it's somewhere else on your site.

Remember to publish your site so your changes are visible to everyone else.

Pull in reviews

[Reviews provide social proof](#) that your products or services are awesome. We've even got some tips on [how to ask your clients for testimonials or reviews](#).

There are two ways to [add reviews to your site](#):

- Manually add a review that someone has sent you via email, text, or somewhere else.
- Automatically incorporate reviews from Facebook, Google My Business, Yelp and Yotpo ([a tool to help manage product reviews](#)).

From your website editor, go to where you want to display your reviews and [add a section](#).

Look for and add a **Reviews** section. You can add more than one **Reviews** section in more than one place.

Edit the title and background image if you'd like.

Remember to [publish your site](#) so your changes are visible to everyone else.

Summary

Your site is published and now you've connected all the parts of your online presence together in one place. The only thing left is to [set up the ability to accept payment online](#).

Note: We offer [GoDaddy Social](#) where our experts manage your online life, if you prefer to spend your time on other things.

[Get online](#) | [Get to know Websites + Marketing](#)
[Set up my visual brand](#) | [Personalize my home page](#) | [Customize content](#)
[Get found with SEO](#) | [Connect to social](#) | [Accept online payment](#)
